Library Packages from Equinox Publishing

EquinoxOnline offers libraries a number of ways to access our new and backlist titles online at significant discounts over the print versions. Our eBooks are not available from any other provider.

- Our list includes over 300 titles, covering archaeology and history, popular music, religious studies and linguistics. Richly interactive and easy-to-use PDF format, and with MARC records.
- Package subscriptions feature unlimited simultaneous use and perpetual access, and include textbooks. Discounts up to 25% are available as well as tiered pricing for smaller institutions. PDA options also available.
- Pick and choose options: libraries can create their own collection by choosing a minimum of 20 titles from any subject area or a combination of subject areas.
- Libraries sign a three-year subscription agreement with an annual opt-out clause.
- Libraries that purchase a current subject collection gain perpetual access to purchased content and can also opt for one of three routes to obtaining backlist access.
- Print discount of 35% off any new book in the current year's collection (hardback where available).
- Individual eBooks may also be ordered.
- Libraries taking both eBook and eJournal packages benefit from an additional 10% discount on the price of both packages.

Library Packages from Equinox Publishing

Discovery and Support

Equinox already works with the most popular web-scale discovery services — Ex Libris Primo, EBSCO Discovery Service (EDS), Proquest Summon and OCLC Worldcat Discovery — by supplying them with complete metadata and full text of our journals. We are also now doing this for our eBooks. With this information the services are able to fully index Equinox content making it more discoverable. Libraries using any one of these online services should find it easy to integrate Equinox electronic publications into their collections. In addition, we offer the following features:

- All new titles available on publication
- Counter-compliant usage stats
- MARC records with direct link URLs for access to the ebook from within the Library Catalogue
- IP or username/password authentication
- Chapter and book level DOIs and abstracts
- Long-term archiving via Portico or as arranged
- Same prices as hardback print (except for textbooks)

User Experience

- Quickly create lists to use with our research tools
- Citation generation and management
- Create a bibliography
- Integrated with tools such as EndNote, BibTeX, etc.
- Save notes / snippets on each book
- Access (download, print) notes without having to find the book
- Copy-and-paste and download individual PDF pages
- Bookmarks can be accessed outside of books, i.e. users can view a list of bookmarks and jump straight into the book at that page
- Fast searches open directly at the page of the result
- Save search results for future reference and refining
- Minimal DRM for package subscribers and most institutional purchases

Accessibility

- Our reader offers a richly interactive and easy-to-use PDF eBook environment, gracefully adjusting itself to the user's particular hardware (e.g. PC, Mac, mobile, tablet) and browser software on PCs (minimum compatibility requirement IE7). For the best results we recommend a modern HTML5-compatible browser or any 'multi-touch' compatible Android / Apple smartphone or tablet)
- Zoom in function enables text to be read clearly at any size
- All titles are available in text-only versions and can be read by screen-reading software
